

## **Iris, iNWS, and the Impact Catalog: Update and Roadmap**

Matt Davis (NOAA/NWS/STI/MDL, LaCrosse, WI)

We will discuss the transfer of the Iris system, including the iNWS and Impacts Catalog applications to operations at NCEP Central Operations. We will discuss also preliminary requirements for the upcoming beta testing period. I will ask questions of participants concerning how to best leverage the VLab collaboration services to build a powerful communication framework for users and external customers.
